The OnPar Report

"Technology Tips to Transform Your Business"

OnPar Technologies Recognized on 2017 CRN Next-Gen 250 List

Durham, NC, November 7, 2017 - OnPar Technologies, a North Carolina based Managed IT Services Provider serving customers nationwide, announced today that CRN, a brand of The Channel Company, has named OnPar Technologies to its 2017 Next-Gen 250 list. The annual list recognizes standout IT solution providers who have successfully transformed their businesses to meet the demands of emerging technologies such as cloud computing, IoT, virtualization, mobility, business analytics and business intelligence.

These solution providers, all in business for fewer than 20 years, have adapted to an evolving marketplace with a notable penchant for bringing key technologies to their clients before they became mainstream. OnPar Technologies is a cloud first, full service Microsoft partner delivering transformative technology solutions that help businesses prosper in the digital age.

"In this digital era, we understand that businesses are constantly having to transform and adapt in an ever-changing competitive landscape," said Jeremy McParlan, CEO, OnPar Technologies. "Our technology solutions can be scaled up, down and securely distributed to the increasingly mobile workforce with ease."

OnPars dedication to providing world-class support in a positive, friendly environment makes them unique in their industry. Their experts strive for first call resolution by dedicating time, attention, and top talent to every call. They are passionate about driving transformational results for small to medium sizes businesses nationwide. The OnPar Team delivers full lifecycle solutions - from project inceptions and planning, to deployment and ongoing support and maintenance.

"This group of solution providers is leading the way when it comes to emerging technologies, bravely stepping into unchartered territory of next-generation IT solutions ahead of their peers," said Robert Faletra, CEO of the Channel Company. "Our 2017 Next-Gen 250 List is comprised of relatively new companies as well as established ones, all sharing the common thread of successful, trailblazing solutions designed to meet an unprecedeted set of customer needs. We congratulate each team on its vision and contribution to the overall advancement of the IT channel."

A sampling of the Next-Gen 250 list will be featured in the December issue of CRN. The complete list will be available online at www.crn.com/nextgen250.

OnPar Technologies was named the Microsoft US SMB East Region Partner of the Year in 2017, and the Microsoft US SMB Champions Club Southeast Partner of the Year in 2016 - making them one of the top Microsoft Partners on the East Coast. OnPar Technologies holds multiple Microsoft Gold competencies relevant to emerging technologies and trends including Gold Platform, Gold Cloud Productivity, Gold Enterprise Mobility Management, Gold Small and Midmarket Cloud Solutions and Gold Windows and Devices.

Modern Biz: Grow Efficiently

The only constant is change, especially when it comes to the technology we use to help run our businesses. And the pace of that change is constantly accelerating, whether as a result of major innovations like cloud computing or the impact of economic events.

Technology should be an asset - one that helps you to anticipate, manage, and respond quickly to change. Technology should also help your organization reduce costs and get more from the investments you make. When it comes to growing with greater efficiency, there are some key questions businesses are asking today:

- How quickly can we get new employees up and running with the tools they need?
- How do we keep up with the massive growth in data needed to do business today?
- Are we getting maximum return on our technology investments?
- Can we simplify IT, so less time is spent on repetitive tasks and more is focused on addressing strategic business needs?

Get solutions that help you grow your business with greater efficiency - by reducing costs and getting exactly the technology you need when you need it. And because it's Microsoft, you can build on familiar tools, so growing your company doesn't have to mean growing your training and ramp up costs.

OnPar technicians are dedicated to providing world class support through seamless implementations and a positive, friendly staff. We make sure that you are onboarded and fully trained so that you are aware of any changes to your business technology needs. We work to understand your current challenges and how OnPar can help alleviate those challenges. If you are interested in receiving a full run down of your current IT network, take us up on our free network assessment at:

Understanding SharePoint Online: A Brief Guide

Have you been interested in acquiring SharePoint Online for your business but don't know where to start? Or, do you currently use SharePoint Online but aren't sure you are using the application to its fullest potential? Did you know that with SharePoint Online you can do the following:

- Build intranet sites and create pages, document libraries, and lists.
- Add web parts to customize your content.
- Show important visuals, news, and updates with a team or communication site.
- Discover, follow, and search for sites, files, and people across your company.
- Manage your daily routine with workflows, forms, and lists.
- Sync and store your files in the cloud so anyone can securely work with you.

You can connect to SharePoint Online directly from your Office 365. Simply open your web browser, sign into your account, and click the SharePoint tile. A SharePoint team site connects you and your team to the content, information, and apps you rely on every day. You are able to access your team site from the SharePoint home page, from the files section of your Office 365 group, or on the go with the SharePoint mobile app.

Schedule a 30 minute- No Obligation- SharePoint Demo

Interested in learning more about SharePoint Online? Schedule a 30-minute demo with one of our Microsoft Certified Technicans. During this demo they will preview a live demo site and review various SharePoint Online capabilities.

www.onpartech.com/ sharepointonline/

Collaborate

With SharePoint Online, open documents from the document library, share a document with internal or external users, work with others on the same document at the same time, and even sync files to your computer.

Create

Easily create sites within SharePoint Online for your various needs. You can create a Team Site to share documents or have conversations with your team, keep track of events, manage tasks, and more with a site connected to an Office 365 group. Or you can create a Communication Site where you can publish dynamic, beautiful content to people in your organization to keep them informed and engaged on topics, events, or projects.

A SharePoint Online Offer For You!

OnPar will create a SharePoint Online baseline site for your business for only $999:

Our baseline site includes the following: logo setup, color, and branding; up to 2 subsites; up to 4 apps per page; inital set up and establishment of company permissions; training on SharePoint Online site for admins and all end users.

Our Microsoft Certified Technician will setup an appointment with you to discuss logitics, needs, and expectations for your baseline site. Our technician will then spend 10 hours building the site. ***This offer requires a current Microsoft Tenant with licensing. This offer is only valid for new clients. Any additional subsites, customization, and/or data migrations can be added for an additional cost.***
