The League of Chaos is coming: protect your business today

The League of Chaos is out there. Plotting. Scheming. Planning ways to get hold of your data. Soon they'll have a perfect opportunity: Windows 7 support ends in January 2020, after which every business that hasn't upgraded to Windows 10 will be vulnerable. Don't be one of them. Upgrade your fleet now and enjoy Windows 10's advanced security features. Or – better yet – refresh your devices as well, and benefit from fully integrated hardware and software. Whichever option you choose,...

What cybercriminals steal when they hack hospitals

By Andréa Morris | Forbes When hospitals have access to your electronic medical record, you get better care. Depending on what you're admitted for, readily available digital health information could be the difference between life and death. But information made digital is information made hackable. Hackers nab more than just your credit cards, social security number, and other demographic and financial information tied to your identity. Hospital breaches include theft of sensitive health information. It's modernity's big tradeoff between data access...
